

CRITICAL INFORMATION SUMMARY

INFORMATION ABOUT THE SERVICE

UCOM Hosted Voice is a combination of a hosted PBX service and a business grade SIP Trunk. It delivers business PBX functionality and allows you to make and receive phone calls by connecting a pre-configured calling device such as an IP phone or a Softphone App to a suitable broadband internet service. The monthly access fee includes a Hosted PBX user licence, a multi channel SIP Trunk, an Australian phone number and access to a wide range of enterprise-grade Hosted PBX features and functions. Calls are free between PBX users on the same system. **UCOM Softphone App** is a feature rich mobile and desktop softphone app that allows you to make, receive and manage phone calls when configured with a UCOM Hosted Voice service.

This service is not appropriate if you require an uninterrupted phone service with access to 000 emergency services and will not function in the event of a power failure.

HARDWARE and INSTALLATION REQUIREMENTS

The Hosted Voice service is only available to use with selected IP devices. UCOM takes no responsibility for the configuration and functioning of IP devices not supplied by the company. An internet service with minimum 100/100 Kbps per concurrent call is required to operate the service. Additional configuration of your network and routers may be required and is not included. The service may not be compatible with certain routers. Please contact our Customer Care Team to check hardware and network compatibility.
