

## CRITICAL INFORMATION SUMMARY

### INFORMATION ABOUT THE SERVICE

#### SERVICE DESCRIPTION and KEY INFORMATION

BusinessCo NBN Broadband provides asymmetrical high speed internet access via the National Broadband Network. The service comes with a static IP address (opt-in) and unlimited data allowance each month.

#### SERVICE INSTALLATION

Standard installation is included if the service is to be connected in an existing developed area. Additional charges may apply if your service installation is deemed to be non-standard. NBN Co will deliver your service to the Network Boundary Point at your premises. The cabling that is required in your premises beyond the Network Boundary Point is your cost and responsibility, as is the provision of a suitable 240V AC power outlet. NBN Co may charge a \$300 new development fee for the cost of deploying network infrastructure to new premises or dwellings, which will appear on your first bill. If you choose to install a second service at the same premises, you will be charged \$297. Please contact our Customer Care Team for further information.

#### IMPORTANT CONDITIONS REGARDING SPEED

Interface speeds refer to the speed of the technology installed at your premises. They are not necessarily equivalent to the download/upload speeds you will achieve in practice. Actual speeds will be affected by many external factors which include the type of NBN technology used to deliver the service, the number of end-users using the service at the same time, the hardware, the software and software configuration, the connection method within the premises and the type/source of content being downloaded.
