

CRITICAL INFORMATION SUMMARY

INFORMATION ABOUT THE SERVICE

SERVICE DESCRIPTION and KEY INFORMATION

BusinessCo NBN Wireless Broadband provides asymmetrical high speed internet access via the NBN Fixed Wireless Network. The service comes with a static IP address and unlimited data allowance each month.

SERVICE INSTALLATION

Standard installation is included if the service is to be connected in an existing developed area. Additional charges may apply if your service installation is deemed to be non-standard. NBN Co will need to install an antenna on your premises with internal wall cabling and a device inside your premises next to a suitable 240V AC power outlet. The provision of the 240V AC power outlet is at your cost and responsibility. NBN Co may charge a \$300 new development fee for the cost of deploying network infrastructure to new premises or dwellings, which will appear on your first bill. If you choose to install a second service at the same premises, you will be charged \$297. Please contact our Customer Care Team on 1300 000 300 for further information.

EQUIPMENT REQUIREMENT

You will require a suitable NBN compatible modem/router for the service to work. If required, we can supply you with the required modem/router at an additional cost. Please note that **your modem/router and internal cabling must be capable of transmitting data at your selected NBN speed in order to take full advantage of the service.** Please contact us on 1300 000 300 for further information.

IMPORTANT CONDITIONS REGARDING SPEED

Interface speeds refer to the speed of the technology installed at your premises. They are not necessarily equivalent to the download/upload speeds you will achieve in practice. Actual speeds will be affected by many external factors which include the number of end-users using the service at the same time, the hardware, the software and software configuration, the connection method within the premises and the type/source of content being downloaded.

MINIMUM TERM

Minimum term is one (1) month.
